

Report 3rd European Convention Meeting, Rome 11/07/2021

Having failed to convene this meeting in due form and time, the current committee is being held in the absence of part of the outgoing scientific team and with the absence of 3 out of 4 members of the incoming CRIF. Nonetheless, it is carried out as the protocol requires. The protocol (copy attached) specifies that the new preparatory group (Scientific and Organising Commissions) and the title of the next Convention must be announced no later than two and a half months after the closure of the previous one.

So, two decisions were taken:

1. the place: after France and Italy, it is now Spain's turn. As Barcelona received the last international events (European Days in 2017, International Meetings 2018) Madrid is being proposed. It would be interesting if the colleague chosen by the current Spanish representative of the CRIF was from the F8 since the previous one was from the FOE, and from Madrid.
2. The topic: bringing together the clinic, the subjectivity of our time and politics, led us to choose «THE ETHICS OF SINGULARITY».
